

# Management of Acute Malnutrition in Infants (MAMI) Project

## Technical review

January 2010

## Contents

<b>Executive Summary</b> .....	<b>11</b>
<b>Chapter 1: Introduction</b> .....	<b>41</b>
1.1 Background to the MAMI Project .....	15
1.2 Aim, objectives & long term vision .....	15
1.3 The process .....	16
1.4 MAMI Project framework .....	16
<b>Chapter 2: Setting the scene</b> .....	<b>17</b>
2.1 Infants and Malnutrition: A Global Public Health Priority .....	19
2.2 Significance of infants <6m .....	19
2.2.1 Infants <6m are unique .....	19
2.2.2 Long term implications of infant <6m malnutrition .....	21
2.3 Global strategies, policy and guidance on IFE .....	22
2.4 Definition of Acute Malnutrition .....	27
2.4.1 Case definitions of acute malnutrition .....	27
2.4.2 Evolution of case definitions .....	28
2.5 Management of Acute Malnutrition .....	29
2.5.1 Supplementary feeding programmes (SFP) .....	30
2.5.2 Therapeutic feeding programmes (TFP) .....	30
2.6 Summary findings .....	32
<b>Chapter 3: How big is the problem?</b> .....	<b>35</b>
3.1 Why population burden of disease matters .....	36
3.2 Aims .....	36
3.3 Methods of determining population burden of disease .....	36
3.3.1 Study design, setting and population .....	36
3.3.2 Data handling .....	37
3.3.3 Data analysis .....	37
3.4 Results .....	38
3.4.1 Country prevalence of infant <6m and child wasting: is it an emergency? .....	38
3.4.2 NCHS and WHO 'cut-off curves' defining wasting .....	39
3.4.3 Differences in severe and moderate wasting .....	39
3.4.4 Implications of prevalence changes for treatment programmes .....	40
3.4.5 Summary of NCHS-WHO regression line equations .....	41
3.4.6 Basic demographic profile of severely wasted infants .....	41
3.4.7 Size at birth and infant <6m wasting .....	42

3.5 Discussion .....	44
3.5.1 <i>Explaining differences in NCHS v WHO-GS</i> .....	44
3.5.2 <i>Clinical profile differences in infants &lt;6 m in NCHS v WHO-GS</i> .....	44
3.5.3 <i>Policy implications</i> .....	45
3.5.4 <i>Limitations</i> .....	45
3.6 Summary findings and recommendations .....	46
<b>Chapter 4: Review of MAMI guidelines .....</b>	<b>48</b>
4.1 Rationale .....	49
4.2 Methods .....	49
4.3 Guidelines overview .....	50
4.4 Guideline Comparisons .....	57
4.4.1 <i>Case definitions of SAM &amp; MAM (general)</i> .....	57
4.4.2 <i>Infant &lt;6m SAM and MAM case definitions</i> .....	63
4.4.3 <i>Key medical treatments for infants &lt;6m</i> .....	70
4.4.4 <i>Nutritional treatments for infants &lt;6m</i> .....	76
4.4.5 <i>Maternal care, preparation for discharge &amp; follow-up</i> .....	83
4.5 An appraisal of current guidelines .....	90
4.6 Summary findings and recommendations .....	92
<b>Chapter 5: Review of field treatment .....</b>	<b>94</b>
5.1 Rationale for field data analysis .....	95
5.2 Aims .....	95
5.3 Methods .....	95
5.3.1 <i>Identifying field data</i> .....	95
5.3.2 <i>Cleaning &amp; processing field data</i> .....	95
5.4 Analysis .....	102
5.4.1 <i>Data selection for analysis</i> .....	102
5.4.2 <i>Data analysis</i> .....	103
5.5 Results .....	103
5.5.1 <i>Country and programme distribution</i> .....	103
5.5.2 <i>Burden of disease of infant &lt;6m malnutrition: age distribution</i> .....	105
5.5.3 <i>Burden of disease of infant &lt;6m malnutrition: sex distribution</i> .....	107
5.5.4 <i>Infant malnutrition profile: Oedema</i> .....	108
5.5.5 <i>Infant malnutrition profile: Anthropometry</i> .....	109
5.5.6 <i>Infant malnutrition profile: Anthropometry-based admission     criteria</i> .....	109
5.5.7 <i>Programme outcomes</i> .....	114
5.6 Discussion .....	119
5.6.1 <i>Principle findings</i> .....	119
5.6.2 <i>Strengths and weaknesses of the analysis</i> .....	119
5.6.3 <i>Future directions</i> .....	122
5.7 Summary findings and recommendations .....	122
<b>Chapter 6: Key informant interviews .....</b>	<b>124</b>
6.1 Rationale and objectives .....	125
6.2 Methodology .....	125
6.2.1 <i>Design</i> .....	125
6.2.2 <i>Participants</i> .....	125
6.2.3 <i>Data collection</i> .....	126

6.2.4	<i>Data analysis</i> .....	126
6.2.5	<i>Limitations</i> .....	126
6.3	Results.....	126
6.3.1	<i>Participant profiles</i> .....	126
6.3.2	<i>Themes</i> .....	126
6.3.3	<i>Emerging Issues</i> .....	127
6.4	Conclusions and recommendations.....	136
6.5	Summary findings and recommendations.....	136
<b>Chapter 7:</b>	<b>Review of breastfeeding assessment tools.....</b>	<b>138</b>
7.1	Scope of review.....	139
7.2	What should a breastfeeding assessment tool include?.....	140
7.3	Methods.....	141
7.3.1	<i>Literature search strategy</i> .....	141
7.3.2	<i>Tool inclusion/exclusion criteria</i> .....	141
7.4	Results & Discussion.....	141
7.4.1	<i>Development and validation of tools</i> .....	141
7.4.2	<i>Coverage of breastfeeding domains</i> .....	147
7.4.3	<i>Tool performance characteristics</i> .....	151
7.5	Limitations.....	151
7.6	Conclusions.....	152
7.7	Summary findings and recommendations.....	152
<b>Chapter 8:</b>	<b>Psychosocial considerations.....</b>	<b>154</b>
8.1	Psychosocial stimulation in the treatment of malnutrition.....	155
8.1.1	<i>WHO guidelines on psychosocial stimulation in the treatment of SAM</i> .....	155
8.1.2	<i>Scientific basis for the WHO recommendations</i> .....	156
8.1.3	<i>Feasibility of the WHO recommendations for psychosocial stimulation</i> .....	161
8.1.4	<i>Adaptation of WHO recommendations for infants under 6 months of age and emergencies</i> .....	162
8.1.5	<i>Conclusions</i> .....	162
8.2	Psychosocial aspects of malnutrition.....	163
8.2.1	<i>Child care practices</i> .....	163
8.2.2	<i>Providing nutrients is not enough to nourish infants</i> .....	166
8.2.3	<i>Malnutrition and attachment: cause or effect?</i> .....	166
8.2.4	<i>Malnutrition and the psychopathology of the child</i> .....	167
8.2.5	<i>Mother-child support system</i> .....	167
8.2.6	<i>Control of resources, autonomy, workload and time constraints</i> .....	168
8.2.7	<i>Conclusions</i> .....	168
8.3	Maternal Depression & Infant malnutrition.....	168
8.3.1	<i>Background</i> .....	169
8.3.2	<i>Methodology</i> .....	169
8.3.3	<i>Results</i> .....	170
8.3.4	<i>Discussion</i> .....	171
8.3.5	<i>Implications for MAMI</i> .....	172
8.3.6	<i>Conclusions and recommendations</i> .....	173
8.4	Summary findings and recommendations.....	173
<b>Chapter 9:</b>	<b>MAMI considerations.....</b>	<b>177</b>

9.1	Conceptual model of management .....	178
9.2	Admission criteria: why they matter .....	178
9.2.1	<i>Admission criteria as a screening tool</i> .....	178
9.2.2	<i>Anthropometry</i> .....	180
9.3	Community based models of breastfeeding support .....	181
9.3.1	<i>Evidence of effectiveness of community-based breastfeeding support</i> .....	182
9.3.2	<i>Determinants of effectiveness of community-based breastfeeding support</i> .....	183
9.3.3	<i>Relevance to MAMI</i> .....	183
9.4	Inpatient models of breastfeeding support .....	183
9.5	Clinical identification of high risk infants .....	184
9.6	Antibiotic treatment in infants <6m .....	185
9.7	Choice of therapeutic milk .....	186
9.8	HIV .....	187
9.8.1	<i>What is the risk of HIV transmission through breastfeeding?</i> .....	188
9.8.2	<i>WHO infant feeding and HIV recommendations (2007)</i> .....	189
9.8.3	<i>Areas of high HIV prevalence</i> .....	190
9.8.4	<i>Testing for HIV in young infants</i> .....	191
9.8.5	<i>Use of antiretroviral (ARV) drugs and cotrimoxazole</i> .....	191
9.9	Individual v population based feeding recommendations .....	192
9.10	Summary findings and recommendations .....	192
<b>Chapter 10:</b>	<b>MAMI recommendations</b> .....	<b>196</b>
<b>Appendices</b>	.....	<b>201</b>
A	Key resources .....	202
B	Conceptual framework for causes of malnutrition in infants <6m .....	203
C	Additional Tables for Chapter 5 .....	204
D	Interview schedules and additional tables for Chapter 6 .....	209
D.1	<i>Steering group meeting report, May 2008</i> .....	209
D.2	<i>Introductory letter for sharing of field data</i> .....	214
D.3	<i>Interview schedule for Chapter 6</i> .....	215
D.4	<i>Key informant interviews</i> .....	217
D.5	<i>Details of key informant interviews – Prevalence and causes of infant &lt;6m malnutrition</i> .....	219
D.6	<i>Details of key informant interviews – Identification of malnutrition in infants &lt;6m and admission to programmes</i> .....	222
D.7	<i>Details of key informant interviews – Programme details</i> .....	224
D.8	<i>Details of key informant interviews – Challenges</i> .....	226
D.9	<i>Details of key informant interviews – Training and support</i> .....	227
D.10	<i>Details of key informant interviews – Ways forward</i> .....	228
E	The Integrated Phase Classification (IPC) .....	230
F	Additional tables for Chapter 8 .....	232

## Tables

<b>Table 1:</b> Contribution of malnutrition treatment and optimal IYCF to meeting Millennium Development Goals (MDGs) .....	24
<b>Table 2:</b> WHO classification of acute malnutrition, 1999 .....	28
<b>Table 3:</b> NCHS and WHO-GS growth norms as applied to the case definition of acute malnutrition .....	30
<b>Table 4:</b> Linear regression models showing relationships between key variables .....	41
<b>Table 5:</b> Overview of available acute malnutrition guidelines .....	52
<b>Table 6:</b> Case definitions of SAM & MAM .....	58
<b>Table 7:</b> Infant <6m SAM & MAM case definitions .....	64
<b>Table 8:</b> Key medical treatments recommended for infants <6m .....	71
<b>Table 9:</b> Nutritional treatments for infants <6m .....	79
<b>Table 10:</b> Maternal care, preparation for discharge & follow-up .....	84
<b>Table 11:</b> Description of the 'raw' databases of children 0 to 59m received for analysis by country .....	96
<b>Table 12:</b> Details of the data cleaning results .....	97
<b>Table 13:</b> Programme type coding .....	98
<b>Table 14:</b> Number of individuals enrolled in different types of programme .....	98
<b>Table 15:</b> Definition of age categories & frequency .....	99
<b>Table 16:</b> Re-coding of original discharge codes into a Sphere-compatible code .....	100
<b>Table 17:</b> Frequency distribution by age group and programme type .....	102
<b>Table 18:</b> Programme and country distribution of the final sample included for analysis and the sub-sample of infants <6m of age .....	103
<b>Table 19:</b> Burden of disease: Age distribution by country and by programme, of the sample of children selected for analysis .....	104
<b>Table 20:</b> Age distribution by country and by programme type of the sample of infant selected for analysis .....	106
<b>Table 21:</b> Male to female ratio by age group, by country and by programme type .....	107
<b>Table 22:</b> Male to female ratio by age group, by country and by programme type for infants aged <6m .....	108
<b>Table 23:</b> Oedema frequency distribution among different age groups and programme types provided for the sample included for SAM analysis .....	108
<b>Table 24:</b> Frequency and percentage of missing values of anthropometry by age group .....	111
<b>Table 25:</b> Frequency and percentage of missing values of anthropometry by country and programme type in infants <6m .....	111
<b>Table 26:</b> Frequency of flagged values using Epi-info criteria by age group .....	112
<b>Table 27:</b> Frequency table for different admission criteria: Comparing infants <6m and children 6 to 59m of age .....	113
<b>Table 28:</b> Sphere discharge outcomes by country and age group: Values in italics are those meeting the Sphere standards/MAMI indicator .....	115
<b>Table 29:</b> Outcomes by programme type and age group: Values in italics are those meeting the Sphere standards/MAMI indicator .....	116
<b>Table 30:</b> Prevalence and causes of infant <6m malnutrition: key informant feedback .....	128
<b>Table 31:</b> Identification of malnourished infants <6m and admission to programme: key informant feedback .....	129
<b>Table 32:</b> Programme details: key informant feedback .....	130
<b>Table 33:</b> Challenges in managing infants <6m: key informant feedback .....	131
<b>Table 34:</b> Training and support: key informant feedback .....	131
<b>Table 35:</b> Ways forward: key informant feedback .....	132
<b>Table 36:</b> Importance gradient of key properties of breastfeeding assessment tools from community to clinical contexts .....	140
<b>Table 37:</b> Theory-based breastfeeding assessment tools .....	142
<b>Table 38:</b> Breastfeeding assessment tools validated against maternal and infant outcomes .....	144
<b>Table 39:</b> Tool coverage of breastfeeding domains and value of use in different contexts .....	148
<b>Table 40:</b> Number of articles by keywords (Medline, February 2009) .....	169
<b>Table 41:</b> Research papers included in literature review on maternal depression (Appendix F) .....	231
<b>Table 43:</b> Discharge codes by country and by frequency (Appendix C) .....	204
<b>Table 44:</b> Oedema by country and programme (Appendix C) .....	208
<b>Table 45:</b> Profile of 31 key informants interviewed (Appendix D) .....	217
<b>Table 46:</b> Cross-sectional studies on maternal depression and child malnutrition (Appendix F) .....	233
<b>Table 47:</b> Longitudinal studies on maternal depression and child malnutrition (Appendix F) .....	235

## Boxes

<b>Box 1:</b> Optimal infant and young child feeding practices .....	19
<b>Box 2:</b> Definition of a breastmilk substitute (the Code) .....	23
<b>Box 3:</b> Guiding principles for feeding infants and young children during emergencies .....	23
<b>Box 4:</b> Key Points of the Operational Guidance on IFE .....	27
<b>Box 5:</b> 'AGREE' criteria for guideline appraisal .....	50
<b>Box 6:</b> Case history: Successful supplementary suckling in Liberia .....	133
<b>Box 7:</b> Case history: Using dedicated infant <6m data to support an innovative IYCF programme .....	135
<b>Box 8:</b> Case history: Integrating mental health and care practices in Afghanistan .....	157
<b>Box 9:</b> Choice of screening strategy .....	179
<b>Box 10:</b> Breastfeeding counselling in a hospital in Bangladesh .....	184
<b>Box 11:</b> Triage system for children with severe malnutrition to improve identification of high risk groups .....	158
<b>Box 12:</b> Estimated potential renal solute loads (PRSL) of human milk and infant formulas .....	186
<b>Box 13:</b> WHO consensus on milks for therapeutic feeding in infants <6m .....	187
<b>Box 14:</b> Case studies .....	189
<b>Box 15:</b> Summary of WHO Recommendations on infant feeding and HIV .....	189
<b>Box 16:</b> WHO AFASS conditions .....	119
<b>Box 17:</b> Vermont-Oxford Network .....	198
<b>Box 18:</b> GRADE & CHNRI frameworks .....	199

## Figures

<b>Figure 1:</b> Interactions between malnutrition and disease .....	20
<b>Figure 2:</b> Bar chart showing deaths by age group in a feeding programme in Kabul .....	20
<b>Figure 3:</b> Life course and inter-generational effects of malnutrition .....	21
<b>Figure 4:</b> Key strategies, policies and guidance related to infant and young child feeding in emergencies .....	22
<b>Figure 5:</b> UNICEF conceptual framework for the causes of malnutrition .....	23
<b>Figure 6:</b> Complicated and uncomplicated acute malnutrition framework .....	29
<b>Figure 7:</b> Ten steps for inpatient treatment of severely malnourished children .....	31
<b>Figure 8:</b> Structure of and patient 'flow' within a CMAM programme .....	32
<b>Figure 9:</b> Country prevalence of wasting (WHZ <-2) as defined by NCHS and WHO-GS .....	38
<b>Figure 10:</b> Weight cut-offs used to define wasting by either NCHS or WHO-GS criteria (boys) .....	39
<b>Figure 11:</b> Scatter plots of country prevalence (NCHS v WHO-GS) of severe and moderate wasting .....	40
<b>Figure 12:</b> Scatter plot on effect of switch from NCHS to WHO-GS on age profile of selective feeding programme admissions .....	40
<b>Figure 13:</b> Age profile of severely wasted infants (NCHS and WHO-GS) .....	41
<b>Figure 14:</b> Sex profile of severely wasted infants (NCHS and WHO-GS) .....	42
<b>Figure 15:</b> Reported birth size of severely wasted infants <6m (NCHS and WHO-GS) .....	42
<b>Figure 16:</b> Prevalence of severe wasting by reported birth weight category .....	43
<b>Figure 17:</b> Prevalence of moderate wasting by reported birth weight category .....	43
<b>Figure 18:</b> Flow diagram of data selection for analysis .....	102
<b>Figure 19:</b> Age frequency distribution at admission .....	105
<b>Figure 20:</b> Forest plots of the risk ratio of presenting oedema for infants <6m compared to children aged 6 to 59 m by country and by programme type .....	110
<b>Figure 21:</b> WHZ distribution at admission of children aged 0 to 60m .....	112
<b>Figure 22:</b> Forest plots of the risk ratio of dying for infants <6m compared to children aged 6 to 59m by country and by programme type using data from the 'raw' datasets .....	117
<b>Figure 23:</b> Forest plots of the risk ratio of dying for infants <6m compared to children aged 6 to 59m in Burundi by different TFC centres and by different programmes, using compiled data from various agencies .....	118
<b>Figure 24:</b> Hypothetical population showing the relationship between different types of acute malnutrition .....	121
<b>Figure 25:</b> Programme with poor outcomes .....	121
<b>Figure 26:</b> Programme with better outcomes .....	121
<b>Figure 27:</b> Programme with good outcomes .....	121
<b>Figure 28:</b> Model of extended care .....	164
<b>Figure 29:</b> Psychological and sociological factors implicated in malnutrition .....	165
<b>Figure 30:</b> Psychosocial factors that aggravate malnutrition .....	165
<b>Figure 31:</b> Conceptual illustration of the difficulties of categorising continual processes in 'malnutrition' .....	179
<b>Figure 32:</b> Effect of community based peer support on exclusive breastfeeding .....	182

## Acronyms and Abbreviations

<b>ACF (AAH/ACH)</b>	Action Contre la Faim (Action Against Hunger/Action Contre la Fambr)
<b>AFASS</b>	Acceptable, Feasible, Affordable, Sustainable and Safe
<b>AGREE</b>	Appraisal of Guidelines for Research and Evaluation
<b>ARV</b>	Antiretroviral drugs
<b>BF</b>	Breast feeding (or breast-fed)
<b>BFHI</b>	Baby Friendly Hospital Initiative
<b>BMS</b>	Breastmilk substitute
<b>CF</b>	Complementary food
<b>CFR</b>	Case Fatality Rate
<b>CHW</b>	Community Health Worker
<b>CIHD</b>	Centre for International Health & Development, UCL, London
<b>CMAM</b>	Community Management of Acute Malnutrition
<b>CSB</b>	Corn Soy Blend
<b>CTC</b>	Community-based Therapeutic Care (original term for CMAM)
<b>DC</b>	Day Centre
<b>DHS</b>	Demographic and Health Survey
<b>EBF</b>	Exclusive breast-feeding (or exclusively breast-fed)
<b>EBM</b>	Expressed breast milk
<b>ENN</b>	Emergency Nutrition Network
<b>GAM</b>	Global Acute Malnutrition
<b>HA</b>	Height-for-Age
<b>HAM</b>	Height-for-Age % of median
<b>HAZ</b>	Height-for-Aged Z-score
<b>HC</b>	Head Circumference
<b>HCW</b>	Healthcare worker
<b>HT</b>	Home Treatment
<b>IFE</b>	Infant Feeding in Emergencies
<b>IMCI</b>	Integrated Management of Childhood Illness
<b>Infant(s) &lt;6m</b>	Infant(s) aged under 6 months (0 to 5.9 months)
<b>IPC</b>	Integrated Food Security Phase Classification
<b>IUGR</b>	Intrauterine Growth Retardation
<b>IYCF</b>	Infant and Young Child Feeding
<b>LBW</b>	Low Birth Weight
<b>MAM</b>	Moderate Acute Malnutrition
<b>MAMI</b>	Management of Acute Malnutrition in Infants < 6m (in general)
<b>MAMI Project</b>	Management of Acute Malnutrition in Infants < 6m Project
<b>MDG</b>	Millennium Development Goals
<b>MoH</b>	Ministry of Health
<b>MSF</b>	Medecins Sans Frontieres
<b>MUAC</b>	Mid-Upper Arm Circumference
<b>NCHS</b>	National Centre for Health Statistics

## Acronyms and Abbreviations

<b>NGO</b>	Non-Governmental Organization
<b>NRU</b>	Nutritional Rehabilitation Units
<b>Ops Guidance on IFE</b>	Operational Guidance on infant and young child feeding in emergencies
<b>OTP</b>	Outpatient Treatment Programme
<b>RCT</b>	Randomised Control Trial
<b>RSL</b>	Renal Solute Load
<b>RUSF</b>	Ready to Use Supplementary Food
<b>RUTF</b>	Ready to Use Therapeutic Food
<b>SAM</b>	Severe Acute Malnutrition
<b>SC</b>	Stabilisation Centre
<b>SFC</b>	Supplementary Feeding Centre
<b>SFP</b>	Supplementary Feeding Programme
<b>SGA</b>	Small for gestational age
<b>SS</b>	Supplementary Suckling
<b>TFC</b>	Therapeutic Feeding Centre
<b>TFP</b>	Therapeutic Feeding Programme
<b>UNHCR</b>	United Nations High Commissioner for Refugees
<b>UTI</b>	Urinary Tract Infection
<b>IASC</b>	Inter-Agency Standing Committee
<b>WA</b>	Weight-for-age
<b>WAM</b>	Weight-for-age % of median
<b>WAZ</b>	Weight-for-age Z-score
<b>WH</b>	Weight-for-height
<b>WHA</b>	World Health Assembly
<b>WHM</b>	Weight-for-height % of median
<b>WHZ</b>	Weight-for-height Z-score
<b>WHZ(WHO)</b>	Weight-for-height Z-score calculated using WHO-GS
<b>WHZ(NCHS)</b>	Weight-for-height Z-score calculated using NCHS references
<b>WHO</b>	World Health Organisation
<b>WHO-GS</b>	World Health Organisation Child Growth Standards, 2006
